

Fabrication Lab 2023 UniLock

Jacopo Caratti, Nicholas Kaegi

01

From FaceGuard to UniLock

FaceGuard

- Store sensible data
- Registration process
- Camera on a public space

Prototyping

“They slow us down to speed us up. By **taking** the **time to** prototype our ideas, we **avoid** costly **mistakes** such as becoming too complex too early and sticking with a weak idea for too long.”

— **Tim Brown**, CEO of **IDEO**

One of the most innovative
companies in the world

FaceGuard takeaways

Computer Vision

Secure storage

Feedbacks

Usability

Secure access

How to combine this
components in a meaningful
way...?

Easy-to-use, easy-to-manage, less privacy concerns, computer-vision

02

UniLock

Workflow

User arrives at the
door...

Login

User provides credentials

QR code generation

A temporal one-time
password is generated

QR scanner

Camera turns on and
user shows the QR

System validates QR, user
is **granted access** to the
FabLab

Connection with Tristan
and Ghamaathige's
project

03

UniLock

Demo

04

Main components

MongoDB = NoSQL database management application, faster and more scalable than SQL.

VS

How to store data?

3 collections

Users

Users information

QRs

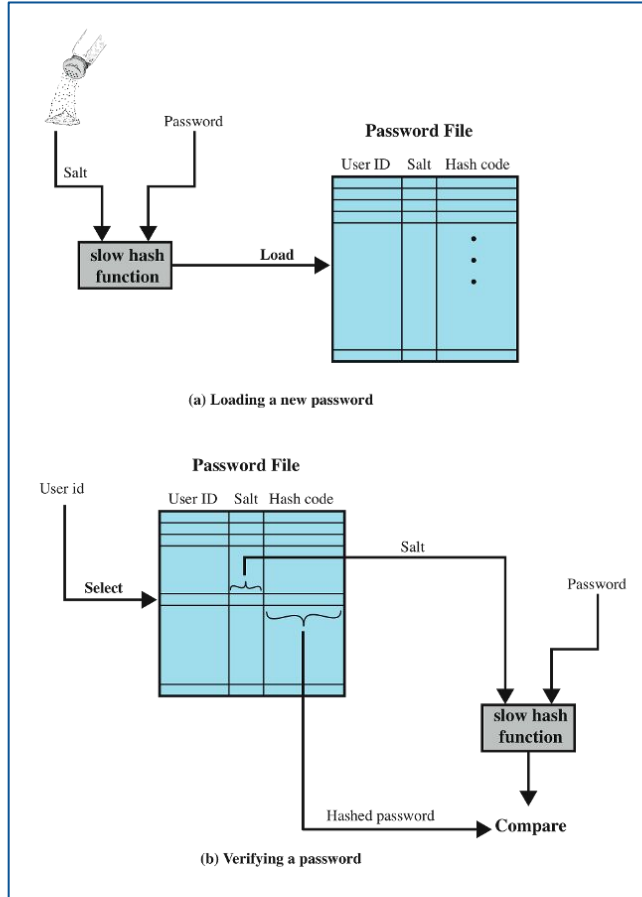

QRs created by the users

Statistics

Track of the number of accesses

Connection with
Adriana's project

How to securely store data?

Credentials securely stored following Unix Encrypted Password System.

Bcrypt, Streamlit-Authenticator

Usability

Easy and fast admin management
and user access.

Web App

Streamlit

vs

Streamlit®

Streamlit = Open-source Python library for building and deploying custom web apps. Compatible with major Python libraries.

Problem:

- no backend development, database management, URL routing

Better idea for the webapp

+ full-stack framework for robust, scalable web apps with extensive functionalities

Public access

- Camera, LED

2 Raspberry Pis

Private

- Web Server, Database

Tech stack

QR VALIDATOR

Hardware

Control cam and feedback LEDs

Web Server

Handle requests from web app

Computer Vision

Extract strings from QR codes

DONE

**Shall we glue the
Raspberry to the wall...?**

UniLock Case

Real QR code
to our website

Place here your
QR to open the door

LED status

05

How to access UniLock

project interoperability

How can you access UniLock?

2 proposals:

Web API We provide some a basic REST API for our projects to talk with.

MQTT We agree on a few topics that our projects can subscribe too.

What do you guys think?

On Protofab clone: </2023/projects/unilock>

Thanks

Do you have any questions?
